RE: Application Received for IGKRF Membership

Dear Dr. Speckter:

On behalf of the board of the International Gamma Knife Research Foundation (IGKRF), I would like to thank you for your application for membership in our group. As you know, the goal of this international consortium is to expand the knowledge base of radiosurgery when using a technology we all share - the Gamma Knife. Our goal is to expand the quality of scientific collaboration, and to advance publications that help define the role of radiosurgery.

I am pleased to say that the executive committee of the board has approved the Centro Gamma Knife Dominicano's request for provisional membership and looks forward to your participation in clinical trials. It is our goal to provide long-term outcome data, as well as to solicit trials from individual institutions proposing research to us, and have it evaluated by our committee for both retrospective and prospective clinical trials.

Thank you for the opportunity to be a part of our team.

With best regards, I remain,

Yours Sincerely,

A handwritten signature in black ink, appearing to read "L. Dade Lunsford", is written over the "Yours Sincerely," text.

L. Dade Lunsford, M.D.
